Investment Objective

Capital Gearing Trust's (CGT) goal is to preserve and grow shareholders' wealth over time. CGT seeks long-term absolute returns through a global portfolio of equities, bonds, and commodities, using a low-cost approach without the use of gearing or short selling. Since 2015, CGT's discount control policy ensures the share price closely tracks the Net Asset Value (NAV) per share by issuing or purchasing shares as needed.

Manager Comment

Notable recent moves have included initiating a position in hedged Japanese treasury bills. Over the past year, index-linked bonds and conventional equity funds have been the top contributors to performance.
